SUPERINTENDENT

# STREET OPENING PERMIT

Permission is hereby granted to:

\_\_\_\_\_ to open \_\_\_\_\_

Name of Person or Corporation

No. and Name of Street

for \_\_\_\_\_

State Nature of Work

## TERMS OF PERMIT

The party to whom this permit is granted must leave the street and surrounding area in as good a condition as existed at the time the permit is granted. If the street is opened all fill or backfill shall be thoroughly tamped every six inches (6"). Only suitable selected material will be allowed around any utility installed and within 12" of the finished surface of the roadway. The permittee shall maintain the surfaces of the roadway over any structures as long as the Superintendent of Public Works may deem necessary, generally for a period of one (1) year, and when possible, tunnel all macadam roads and sidewalks and protect them with barricades by day along with lights at night. Any pavement disturbed is to be sawcut and infra-red patched within six months to one year of completion.

Wherever the hardened surface of the roadway, gutters or any part of the surface of the highway is disturbed it shall be replaced in as good a condition as before it was disturbed. In no case shall there be less than 4" of bituminous concrete placed as a finished surface over trenches.

No work shall be covered or concealed in any manner whatsoever until inspected and approved by the Superintendent of Public Works, or his designee. This stipulation shall apply to trenches, manholes, culverts, etc. All policies, rules, regulations and specifications of the Town of Middleton regarding backfilling, compacting, and patching of trenches are hereby included and accepted as part of the Street Opening Permit.

Should any work be concealed without such approval, said work shall be uncovered at the sole expense of the permittee or persons responsible for the work. After inspection, with the approval of the Superintendent of Public Works, backfilling may proceed in the manner set forth above. In no case shall frozen material be used for backfilling.

Fire Department is to be notified at commencement and completion of work and eleven (11) foot clearance on the travelled way must be left at all times for passage of fire apparatus.

Neglect to comply with these conditions or any special conditions listed below will result in revocation of this permit and the acceptance of this permit or the doing of any work thereunder shall constitute an agreement by the permittee to comply with all the conditions and restrictions written herein.

Work is not to commence until police officer, if required, is present.

Permittee shall retain copy of this permit at the job site.
